# How to Upload Your File to Dropbox

1. Select "Upload File Here"

2. Dropbox will open in your browser.
   You do not need a dropbox account to upload your file.

3. You can then drag your file into the drop box.

4. Once your file is uploaded, select the "Upload" button.

5. You will be notified on screen when your file is uploaded.
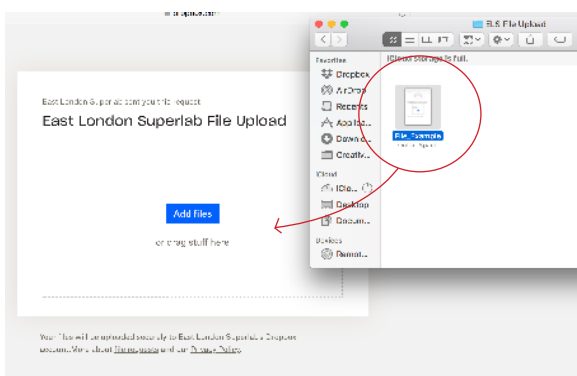

6. When you upload a file, you must send us an email to notify us with your name, the name of the file you have uploaded.

*If you do not do this, your file will be deleted from our server and your print will not be completed.*

If your file is larger than 2GB, you will not be able to upload it to the dropbox we have provided. In this case, please email us and we will get back to you with a separate arrangement.

Preparing Your File

You can download the "ELS ICC PROFILES" folder on our website for lots of information about preparring your files.

Go to: "ELS_ICC_PROFILES" > "Paper Profiles" > "Canson_Epson_SC_p9500" > "epson_sure_color_p9500-9560-9570_125836.pdf"

There you can check out the highlighted sections for more information:

What is an ICC profile?

An ICC profile will enable you to maximise the print quality and reproduce accurately the original colours, by calibrating the printer settings prior to printing.
Because each paper has a slightly different shade, surface structure and reacts differently, it is important that use the ICC profile that is specifically designed for this paper.

Profile installation

Save the icc profile in the correct location on your computer so that the application can access it:

- Mac OS X : /Library/ColorSync/Profiles
- Mac OS 9.x : System Folder/ColorSync Profiles
- Windows 2000, XP, Vista : \Windows\system32\spool\drivers\color

You can right-click on the ICC profile and choose to install
Important Note: If you are replacing a profile in Windows XP, the above shortcut does not work. The profiles must be manually copied to the correct directory for the original profile to be replaced.

You can also check out the ICC installation and installing profiles information on the hahnemuehle paper manufacturer website:

https://www.hahnemuehle.com/en/digital-fineart/icc-profile/installing-profiles.html
